DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-7, 9-14 and 16-20 are rejected under 35 U.S.C. 102(a) or (e) as being anticipated by Barbour (6,712,067), which shows all of the claimed limitations. Barbour

Art Unit: 3749

shows a stove including, among other things, a shell 14, support 12, burner assembly 16, vessel support rack 18 with a first side surface and a second side surface for supporting flat and non-flat bottomed cooking vessels, respectively (see at least figs. 7,9,10,11). Barbour further shows a metal ring 30 interconnecting the support segments, and an intermediate ledge portion 26.

3. Claims 1-3, 7, 9, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Dutro (5,158,067), which shows all of the claimed limitations. Dutro shows a stove including, among other things, a shell 14, support 12,13, burner assembly 47, vessel support rack 42,61 with a first (outer) side surface 42 and a second (inner) side surface 61 for supporting flat and non-flat bottomed cooking vessels, respectively (see at least col. 4, lines 1-12). Dutro further shows a metal ring 40 (integral) interconnecting the support segments 42,61, a plurality of vent holes 59, and an intermediate ledge portion 39,40.

4. Claims 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Fisher (WO02/066899), which shows all of the claimed limitations. Fisher shows an invertible vessel support rack including, among other things, a first side surface (see at least fig. 1) and a second side surface (see at least fig. 2) for supporting flat and non-flat bottomed cooking vessels, respectively.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3749

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining

obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 8 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barbour (6,712,067), which discloses substantially all of the claimed limitations.

Barbour does not specifically recite adjustable legs. Official Notice is given that making legs adjustable is old and well known in the art. Such an arrangement has the clear and obvious benefit of providing for varying the height of the device and thereby providing for greater comfort and convenience in the use thereof. Accordingly, it would have been

Art Unit: 3749

obvious to one of ordinary skill in the art at the time of the invention to incorporate adjustable legs into the invention disclosed by Barbour, so as to provide for varying the height of the device and thereby providing for greater comfort and convenience.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alfred Basichas whose telephone number is 703 306 3476. The examiner can normally be reached on Monday through Friday during regular business hours.
